

# Brain Power

Can you help find a magic number by solving the equations on the left? When you have the answers to the equations find the number in the picture on the right and colour it in. Once all the answers have been found in the mans brain, two numbers will be left over. Add these two numbers together to reveal the magic number.

1.  $4 \times 3 =$  12

2.  $2 + 2 =$  4

3.  $5 + 4 =$  9

4.  $9 - 1 =$  8

5.  $3 \times 9 =$  27

6.  $9 \div 3 =$  3

7.  $30 \div 2 =$  15

8.  $12 - 6 =$  6

9.  $12 + 7 =$  19

10.  $4 \times 4 =$  16

11.  $10 + 10 =$  20

12.  $29 - 12 =$  17

Add together the two left over numbers

5 + 7

**Magic Number =** 12
